

PGMC\_ILTS Integrated Lottery System  
Secure. Reliable. Fast.

# PGMC\_ILTS DataTrak SafeGuard

*Replicates data between Primary Data Center and Backup Data Center  
in real time to provide a robust solution for disaster recovery*

**ISO 9001:2015 Certified.**  
**ISO/IEC 27001:2013 Certified.**  
**WLA-SCS:2016 Certified.**

PGMC\_ILTS DataTrak SafeGuard is an optional premium feature for the PGMC\_ILTS DataTrakII Lottery System which provides automatic, real-time synchronization of transaction and control data between a Primary Data Center and a Backup Data Center. PGMC\_ILTS DataTrak SafeGuard leverages the existing secure logging and recovery features of the PGMC\_ILTS DataTrakII system to provide a robust solution for disaster recovery. In the case that the Primary Data Center were to go down (fire, natural disaster, etc.), PGMC\_ILTS DataTrak SafeGuard allows the Backup Data Center to be placed back online quickly. The quicker the Backup Data Center is back online, the sooner retailers can resume sales.

- Synchronization of the remote logs
- Remote access to logs
- Recovery at the Backup Data Center
- Remote operation
- Compare data
- Remote log recording mode outside Primary Data Center

PGMC\_ILTS DataTrak Safeguard includes software modules and system configuration installations to enhance processing ability for disaster recovery of the lottery system. In addition, these modules synchronize the recording of transactions between the Primary Data Center and the Backup Data Center while providing all functions required to recover and operate the system from a remote location.

To achieve optimal performance, PGMC\_ILTS DataTrak SafeGuard is designed to provide secure inter-site data synchronization services when using a stable high speed 10 Mbps communication link between the Primary Data Center and the Backup Data Center.
